THE PRECISION OF SWISS TECHNOLOGY

Innovative Swiss technology is fundamental to the benefits shown by **NEOCUTIS** skincare products. A series of exclusive technology platforms, based on cutting-edge scientific research, delivers the innovation for which **NEOCUTIS** is renowned.

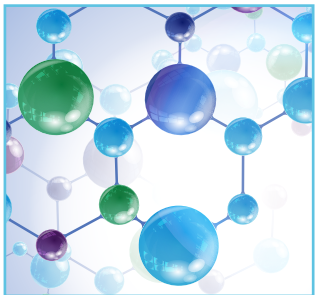

THE SCIENCE OF SKINCARE

Powered by the fusion of science and Swiss technology, **NEOCUTIS** offers a comprehensive collection of skincare solutions to address key concerns, including the signs of aging, discoloration, oxidative stress and skin dryness.

INSPIRED BY SWISS RESEARCH

Nestled within the spectacular beauty of the Swiss city of Lausanne is the prestigious University Hospital. Originally established in the thirteenth century, today, the University Hospital of Lausanne is a leading international research facility in medicine, and the birthplace of modern Swiss innovation.

UNIQUE DISCOVERY

Through years of intensive research on scarless wound healing, physicians discovered the unique ability of fetal skin to heal without scarring. Inspired by this phenomenon, medical researchers at the University Hospital of Lausanne created a biotechnology process to obtain the rich proteins involved in scarless wound healing from cultured fibroblasts.

UNPARALLELED INNOVATION

A dedicated cell bank was established for developing new skin treatments for wound healing and burns. The cell bank was established under the strict laws and ethical standards of Switzerland using a single donation of fetal tissue. A lasting supply of fibroblasts from that same cell bank is used to produce PSP®, which is a proprietary cosmetic ingredient exclusive to **NEOCUTIS**.

PSP®: THE "CADILLAC" OF PEPTIDES!

Patented **PSP®** (Processed Skin Proteins), state-of-the-art technology platform, harnesses the power of natural proteins, also referred to as "peptides." PSP® is an optimal mixture of essential skin nutrients including various peptides such as Human Growth Factors, Interleukins and other Cytokines.

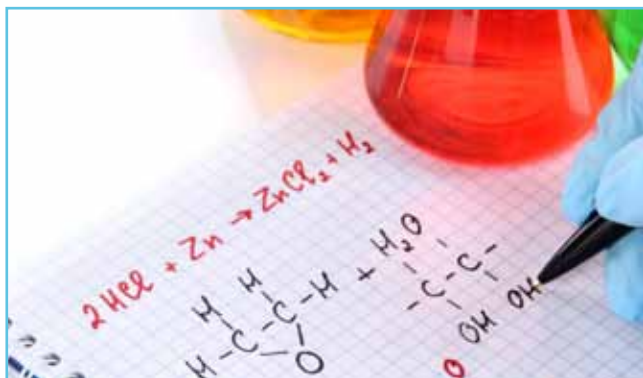

COSMETIC TECHNOLOGY

MELAPLEX®, a proprietary, innovative skin-brightening complex, is a Hydroquinone-free alternative that helps improve the appearance of skin discoloration and aging skin. Centered on the latest scientific research, MELAPLEX® offers demonstrated results.

ROSAPLEX®, an exclusive technology platform, addresses skin redness. Based on the theory that an imbalance in skin's natural harmony contributes to the appearance of redness, this complex formulated with Glycerin is designed to help balance skin's equilibrium.

VITAPLEX C™ is a patent-pending technology platform, which provides an advanced defense against skin-aging free radicals. A synergistic blend of stabilized Vitamin C at a concentration of 15%, plus a selection of other potent anti-oxidants and energizing Creatine, work to help neutralize free radicals and promote anti-oxidant regeneration.

HYALURONATE Premium grade Hyaluronic Acid technology improves skin hydration by delivering immediate moisture to the dermal layer of the skin. The high concentration of Hyaluronic Acid is key to obtaining optimal anti-aging results.

CUSTOMIZED BIO•CHEMISTRY

BIO•ESSENTIALS™

The BIO•ESSENTIALS skincare collection is the core daily regimen. Powered by demonstrated effective PSP® to help rejuvenate, energize and nourish the appearance of skin, the BIO•ESSENTIALS are multi-functional and suitable for all skin types, including sensitive skin and delicate post-procedure skin.

SWISS BOOSTERS®

The SWISS BOOSTERS are a collection of targeted problem solvers. Layered into the BIO•ESSENTIAL skincare regimen, these “Boosters” offer the option to help improve skin's visible imperfections on an individual basis, with innovative technology and premium-grade cosmetic compounds.
